EDUCATION

University of California, Santa Barbara | Environmental Studies, BA
August 2023 - June 2025, GPA: 3.8

Orange Coast College, Costa Mesa | Communications, AA-T
January 2022 - August 2023, GPA: 3.2

California State Polytechnic University, Pomona | Communications, BA
August 2020 - December 2021, GPA: 2.9

RELATED COURSEWORK

ENV S 165A and B, Environmental Impact Analysis: Introduction to CEQA policies and theoretical framework behind environmental assessment methodology. Advanced seminar (course B) included drafting an FEIR and practicing realistic planning techniques such as site visits and information acquisition about our resource of interest.

ENV S 135A and B, Principles of Environmental Planning: Introduction to environmental planning framework and theory specific to the US/California. Worked with a group to draft a hypothetical staff report, in compliance with Santa Barbara/Goleta/Coastal Commission policies, to present to a planning commission.

ENV S 114A and B, Soil Science/Soils of California: Introduction to principles of soil science and soil classification, in addition to hands-on experience digging soil pits, practicing field safety, and synthesizing/communicating reports using data collected in the field. Provided emphasis on the preservation of archaeologically sensitive artifacts during our excavations.

ENV S 193DS, Statistics for Environmental Science: Introduction to R and R Studio, practiced statistical analysis using the R programming language to create data visualizations from real-world data sets. Learned how to interpret and contextualize statistical results in general concepts from environmental studies, as well as developed an understanding of various statistical analyses. Encouraged to utilize AI tools responsibly in completing our coursework.

GEOG 176 A, B, and C, Geographical Information Systems: Practiced and gained familiarity with ArcGIS Pro software and tools associated with conducting spatial analyses in a research setting. Created numerous maps and worked on group projects related to environmental topics and issues, demonstrating proficiency with GIS tools and research protocols.

ENV S 60, Applied Ecology: Studied human interaction with their environment: socially, physically, and biologically. Developed an understanding of ecological literacy and principles surrounding organisms, populations, communities, and ecosystems. Studied and reported on current/historical topics related to conservation and restoration with an emphasis on current challenges in environmental management.

RELATED EXPERIENCE

INTERN

June 2019, 40 hours

PROBOLSKY RESEARCH, LLC

- Researched and synthesized data in Google Sheets and reported information to my colleagues
- Learned how to process information and how a professional work environment operates
- Experienced and learned effective communication within a team setting

GARDEN OPERATOR

May 2024 - June 2025

EDIBLE CAMPUS PROGRAM: University of California, Santa Barbara

- Maintained and operated the Green House and Garden Project community garden located in Goleta, just outside of Isla Vista
- Performed various daily maintenance tasks such as watering and weeding
- Responsible for corresponding and working with volunteers of the UCSB community to experience and work in the garden
- Held volunteer workdays and managed groups of volunteers to achieve tasks around the garden
- Wrote weekly emails that provided updates to the garden, helpful information, and provided an opportunity for community engagement within the garden

RESEARCH ASSISTANT

July 2025 - August 2025

KING SOIL LAB: University of California, Santa Barbara

- Worked under PhD candidate Jesse Landesman in a Camarillo avocado orchard, augering and collecting soil samples from different depths/locations
- Weighed and separated soil samples in a lab, measured soil gravimetric water content, and utilized lab ovens
- Field Futures/safety trained
- Worked efficiently outdoors for long periods in a team with other colleagues
- Well-versed in operation and knowledge of fieldwork tools

RESEARCH ASSISTANT

March 2025 - October 2025

PERRONE WATER LAB: University of California, Santa Barbara

- Assisted in gathering groundwater well-drilling data from several US states, cold calling via phone, and recording data
- Weekly meetings with PhD candidate Kelly Garvey, Project Manager, to discuss groundwater well policy and infrastructure (well anatomy, lithology, and data findings)
- Review of data analysis in Python and QGIS

OTHER WORK EXPERIENCE

General Merchandise/Barista

June 2020 - July 2021

Target

- Worked in guest advocate positions across the store, including cashier, mobile orders, door attendant, and cleaning specialist during the COVID-19 pandemic
- Trained in DBO responsibilities and worked in every department except beauty and apparel
- Learned how to work on my feet and how to coordinate with others efficiently to push products daily
- Transferred from general merchandise to Starbucks within Target due to a lack of help, learned how to work more effectively with smaller teams, and worked by myself in busy situations
- Learned how to work and think on my feet by myself in high-stress situations while maintaining careful attention to detail

Apprentice

January 2013 - December 2016

L & M LANDSCAPING

- Assisted with any labor and planning that was performed
- Learned the fundamentals of landscaping as well as the process of performing landscape renovations and construction
- Worked outside laying brick, measured square footage, and operated heavy machinery

Volunteer Youth Teacher

July 2016 - July 2019

Swords for Christ Ministries

- Maintained church facilities via janitorial duties - sweeping, mopping, and any sort of cleaning
- Gained teaching experience via teaching lesson plans every Sunday, ensuring the material was understood by the children
- Worked with kids ages 6 - 10 and was in charge of the classroom for extended periods of time

Student Participant

July 2019 - August 2019

National Youth Leadership Conference, Seattle: Game Design

- Learned the fundamentals of what it means to be an effective leader within various contexts
- Gained experience working with different learning and leading styles
- Worked with a team to create a video game in one week – producing in-game music, coding/designing the game, and advertising it
- Learned from working professionals and studios in the field of game design, such as Big Fish Games

Arts Assistant II

November 2025 - Present

Anaheim Unified School District

- Worked with students one-on-one to reinforce learning materials being taught by the music director
- Practiced with students who struggled to learn proper technique and timing
- Reinforced understanding of music tablature and sight-reading

E-Sports Event/Player Photographer

November 2025

UCLA E-Sports Club

- Photographed tournaments for their marketing team, incentivizing higher attendance for events
- Photographed headshots for individual players across all teams
- Provided light editing services

Personal Interests

- Outdoor Recreation (rock climbing, hiking, running)
- Photography (freelance and hobbyist)
- Video Games
- Guitar, self-taught for 3 years (Squire Jazzmaster, Fender Stratocaster MIM 1996, Epiphone SG Standard)
